

Nagno celebrates its 15th Anniversary in the technology and business consulting industry

Nagno LLC, a leading systems integrator and business intelligence company, celebrates its 15th Anniversary this year. The celebration comes with an aggressive plan to expand its services to the United States.

In 2002, Nestor Figueroa and Miguel Colom-Mena established the company with the vision of being pioneers in the development of business intelligence solutions in Puerto Rico. During the past 15 years, Nagno has successfully developed hundreds of solutions for well-known companies in numerous industries such as government, health, automotive, education, food distribution, media, among others. Today, Nagno is focused on developing its own products for the healthcare industry and exporting them to the United States.

"Excellent opportunities have emerged to expand our services within and outside the island. Our goal for 2017 is to have a more active participation in the United States market in our area of expertise", said Miguel Colom-Mena, principal and co-founder of Nagno.

Nagno introduced its first product, STARSTrack, in 2012 addressing the need of Medicare Advantage health plans to monitor the Centers for Medicare and Medicaid Services (CMS) Five Star Quality Rating Program. Now, STARSTrack is well positioned in Puerto Rico's health plans market with clients like MCS, MMM and Triple-S and has helped all three of them to achieve a 4 out of 5 star quality rating.

Nagno continues to innovate within the healthcare market by developing other solutions such as OneX, an enterprise Data Warehouse built to integrate, store "a single version of the truth", and analyze patterns and trends in healthcare data.

"All of our achievements are a result of the effort we make with our team of professionals. We motivate them to be constantly searching for innovative solutions to remain competitive", added Nestor Figueroa, co-founder. "This entails nurturing a corporate culture that fosters creativity and that, in turn, has the capacity for global integration", concluded Figueroa.

Colom-Mena and Figueroa remain firm in their philosophy of supporting professionals who decide to develop in the Island. "In our company, we bet on local talent. We have exceptional professionals who are experts in business intelligence and technology. Several of our employees are well-known figures that influence thousands globally in their respective fields. We have seen young talents grow and stand out in the information technology arena and being recognized internationally", added Colom-Mena.

About Nagnoi:

Founded in 2002, Nagnoi has a trajectory of excellence that has been internationally recognized on multiple occasions. Nestor Figueroa and Miguel Colom-Mena are its founding partners. In 2011, Nagnoi was awarded Worldwide Business Intelligence Company of the Year and in 2013 and 2014, the Health Partner of the Year Award, both by Microsoft Corporation. In 2012, Nagnoi was included in the Forrester Research Business Intelligence Service Provider Shortlist. In 2016, the Chamber of Commerce of Puerto Rico granted the 2016 Zenit: Emerging Healthcare Technology award to Nagnoi. For more information, visit www.nagno.com.
